

AUTOAUTH RX™

E-PRIOR AUTHORIZATION APPLICATION

I don't understand why my doctor gives me a prescription for a drug that the pharmacy says needs prior approval from my insurance company. Don't they realize I don't have extra hours to hang around the drug store waiting for everyone to agree?

APPLICATION BENEFITS INCLUDE:

- Reduced processing time by connecting physician to clinical pharmacy of health plan or PBM in real-time
- Better physician – patient communication through online access at POC to formulary, past medications, and pharmacy benefits
- Compliance process improvements with documentation and reporting of all PA requests and resolution timelines.
- Accurate benefit payment processing through real-time integration to pharmacy claim processing services.
