

RxMONITOR®

DRUG UTILIZATION ANALYSIS & REPORTING

Since we have members with Commercial, Medicare, and Medicaid benefits, we get to compare prescription utilization by line of business, by group account, and by member. We also get physician prescribing information as well as care management reports identifying patients at risk or who need adherence support.

Reporting features include:

- Member-specific drug utilization detail
- Brand & generic drug market share by class, patient condition, and prescriber
- RxPMPM cost comparisons by line of business and by group accounts
- Exportable data and analysis reports
- Secure application access privilege options
